SKILLS

- JavaScript
- React
- Angular
- NextJs
- Redux
- HTML5 | CSS3 | Bootstrap

PROJECTS

- ZenFitX **(Live)**
  - Constructed the frontend(mobile-web only) for this fitness activity booking app
  - Created landing pages, login via OTP, payments, booking flows, checkout pages, and more.

- Crypto Price Tracker **(Live)**
  - Provided real-time access to prices of over 250 cryptocurrencies using Coinbase Pro APIs
  - Utilized WebSockets

- Portfolio **(Live)**
  - Developed and designed a personal portfolio utilizing React and tailwind showcasing my expertise in frontend development and design

- Twitter Clone **(Live)**
  - Built a frontend Twitter clone using React.js, styled using CSS, material UI and Deployed using Firebase

EXPERIENCE

JOVEO | Software Engineer
May 2022 - Present | Remote

- Led frontend development for the platform engineering team, delivering central features and packages for 10 different products. Implemented frontend for managing authentication for all products, including login via Email, Google, and a centralized logout, and an embeddable App switcher for navigating across all products.
- Developed UI for an Advanced User Management system that manages users, user groups, and roles across 10 different products, enabling seamless access control. Reduced tech-ops involvement in access control by approximately 80%.
- Created an embeddable, customizable, generative-AI-powered chat-bot for web applications, enabling developers to tailor headings, avatars, and animations to match branding and UX needs, and decreased CSM queries by approximately 30% .
- Engineered a streamlined interface inspired by Facebook Business Manager to manage ads, campaigns, and budgets. Aligned with Facebook's design standards, it attracted over 10 new customers within a month, showcasing its impact on user engagement and acquisition.
- Collaborated with the Design team to enhance the UI/UX and accessibility of existing systems over a four-month period, resulting in a 210% improvement in the NPS score (Q4 2023).
- Contributed to the design system library, developing modular React components, standardized fonts, and color schemes, significantly improving development efficiency and saving substantial time and effort.

OFBUSINESS | Software Engineer-UI
June 2021 – May 2022 | Gurugram

- Designed and implemented the user interface for E-way Bill extension and cancellation, replacing manual processes through government portals. This enhanced efficiency and streamlined logistics for the operations team.
- Created a user interface facilitating ledger management, email dispatch, and client onboarding via GSTIN, PAN, and bank accounts. This automation replaced manual processes, enhancing efficiency and accuracy.
- Developed central dashboards for internal users to view and take action on items like pending loans, applications, and reminders.

ZOSTEL | Software Engineering Intern
Jan 2021 – May 2021 | Remote

- Designed and built an Instagram-like UI with additional tools for monitoring social media metrics from scratch.
- Implemented dynamic grids and charts for real-time monitoring of bookings, sales, and ratings, replacing manual Excel comparisons and saving significant time and effort.
